OTHER DEVELOPMENT TOOLS

Git

Sidekiq for multi-threaded processing

Redis for key-value data storage

Nokogiri for web scraping/crawling

Rake tasks / Cron jobs

Heroku (for quick deployment)

awards

San Mateo County \cdot

Jun 2015

2nd place at HACK SMC hackathon

The San Mateo County sponsored HACK SMC hackathon focused on improving the community and how city officials provided services in San Mateo County. Our team of two developers and a designer created a prototype of an app, in six hours, that would allow users to report and vote on issues in the county that needed to be addressed. We won second place, out of over a hundred participants.

US Army · Joint Service Achievement Medal Dec 2010

During deployment for Operation Iraqi Freedom in 2010, was awarded the US Army Joint Service Achievement Medal for exemplary service.

activities

Code 2040 Technical Applicant

Attended Code 2040's 2015 technical applicant retreat, focused on helping Latino and African American developers network and develop soft skills, and remain an active member in the Code 2040 community.

Active member of various Meetups

Regularly attend the HTML5SF, NodeBots, Protonight - Pair Programming, and Bay Area Software Engineer (BASE) meetups.

summary

Hardworking and detail-oriented junior full-stack developer with a mission first mentality. Started self-taught, and added six months of boot-camp experience, developing in the MEAN stack, as well as in Ruby and Rails applications. Practiced test-driven development (TDD), pair programming, and object-oriented programming in an academic setting with Galvanize's full-stack bootcamp. Happiest when in that area between stumped on a problem and doing the happy dance because you finally solved it.

education

Galvanize Full-Stack Developers Program

Six month/1000+ hour web development course, focused on Javascript, Node.js, Express, Ruby, Rails, Angular, and front-end development.

San Francisco State-University

B.A. in Anthropology, with a minor in Middle Eastern and Islamic Studies - completed in 2014

projects

ADA Map

A way for users to identify, map, and vote on issues not in compliance with the American Disabilities Act (ADA). The goal is to prioritize local ADA issues, and create a public forum about those issues. Prioritizing is currently the number one hurdle to ADA accessibility, requiring large amounts of staff and volunteer hours. ADA Map empowers users to choose what civic improvements should be made first.

Stack: Created with Express and MongoDB on the back-end, and jQuery on the front-end.

Url: https://adamap.herokuapp.com/

Twixt

A group management tool built around to-do lists. Users are able to send email and text message reminder notifications, either right away or scheduled to be sent at a later time/date. Users can upload photos, manage multiple groups, and groups can manage multiple lists.

Stack: Created with Rails and postgresql on the back-end, and jQuery on the front-end.

Url: https://twixt.herokuapp.com/

relevant employment

US Army and Army Reservers

All-Source Intelligence Analyst

Earned and maintained a Top Secret/SCI government security clearance (currently expired).

Served as a subject matter expert on terrorist/insurgent threats in the Baghdad and Anbar regions.

Conducted data analysis to track and predict attack patterns for terrorist/insurgent groups in Iraq.

Composed and reviewed intelligence papers to be submitted to the Commanding General, or disseminated to the greater intelligence community.

Prepared and presented intelligence briefs to command staff.

2007 to 2012
